### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance of claims 1-17: The prior art did not teach or suggest a device for injecting a pulsed supersonic gas flux as claimed by the applicant, specifically an injection device comprising a means for setting the free piston into motion, connected to the first chamber and capable of causing propulsion of the free piston, a supersonic nozzle for ejecting the gas, capable of communicating with the first chamber via an aperture provided in the first chamber and a valve closing up the aperture and able to be actuated by percussion of the free piston, together in combination with the other claimed features of applicant's invention. In regard to applicant's use of means plus function language in claim 1, "i.e. means for setting the free piston into motion", note the examiner takes the position that 35 U.S.C. 112, 6<sup>th</sup> paragraph is not invoked due to the recitation of "capable of causing propulsion of the free piston", which does not meet the third prong of the 3-prong analysis. The recitation of "capable of causing propulsion of the free piston" acts to modify the "means for" recitation for achieving the specified function of "setting this free piston into motion".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
